

# EGESTAT EDS UPD - HTTP Server

RELEASE NOTE

**2015-05-26** V1.10.10 [download](#){.auth-downloads}

---

BUG FIX, NEW FEATURES, MINOR UPDATES

## INFORMATION

---

### INSTALLATION GUIDE

- Install *egestedsudp-setup-1.10.10.exe*
- Edit file *config.json* to configure *upd\_remotes*
- Restart "egestedsudp" windows service
- Server Host Configuration (Optional):
  - Add "host" property to config.json to listen only one address.
  - Config.json example:

```
{ "host": "192.168.1.100", "port": 8081, "udp_remotes": [{ "address": "192.168.1.108", "port": 12450 }, { "address": "127.0.0.1", "port": 12450 }], "log": false }
```
