

# Facebook model

## Goal

The model is permitting, thanks to some Facebook developer API private parameters, to display

- the private and public posts of the Facebook account which is used (known through the AppID and User access token) or
- the public posts of any Facebook Web page

## AppID and User Access token (facebook developer parameter)

Given that the model is using facebook developer API, it is required to enter in the Facebook model form,

- your **AppID** and
- your **User access token**.

<ul style="list-style-type: none"> <li>• AppID           <ul style="list-style-type: none"> <li>◦ ex :               <div>25099610205658</div> </li> </ul> </li> <li>• User Access Token           <ul style="list-style-type: none"> <li>◦ Ex :               <div>AADkR4ZBK6YsBAO8bpFTponlhMZB2lbXmrxcUIpYFgUzNVcKMSoVBytsa05Rp5QkeSNdse2xNz2HcabUauaCjsuOdVF17SppNuscfpurVZBax0a3FD5g8VShddE9TM5aeNod8ZA1EGveyAfZCpBcjsLYC5uJxJ0pvNYYJ0tQZDZD</div> </li> </ul> </li> </ul>
--

To create your **AppID** and your **user access token**, follow the « How to » in the Innes guideline :

<https://www.innes.pro/widgets/facebook/index.html>

Afterwards, store preciously this information provided by Facebook

<ul style="list-style-type: none"> <li>• <b>App ID</b></li> <li>• <b>Client Token</b></li> <li>• <b>User Access Token</b></li> </ul>
--

**WARNING:** Some Facebook accounts have been unexpectedly blocked by Facebook moderator when using Facebook developer API. We recommend to take some precaution when using this model and reading Facebook usage conditions <https://fr-fr.facebook.com/terms> (particularly the chapter 4). Indeed to prevent Facebook to block your account, you have to warranty the unicity and the validity of the private datas which are provided to Facebook.

## Model Facebook thumbnail

The Facebook model is embedded in the model pack 3.49.

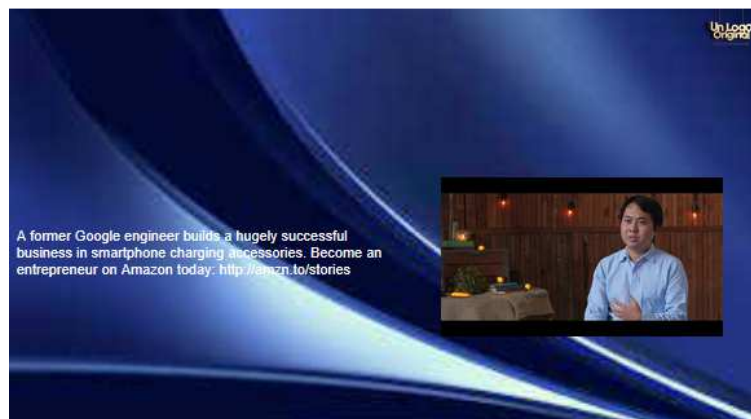

## Model form

Please enter a public account.

- field « Facebook application identifier » : fill with your **AppID**
- field « User access token » : fill with your **User Access token** (don't mistake with **client token** !)
- Mode « Display publications form »
  - Value **My account** : (default mode) display the private and public posts of the Facebook account (in which the App has been created)
  - Value **Public account with identifier** : display the public post of any Facebook account
    - Ex : to publish France2 posts, <https://www.facebook.com/france2/>, enter « france2 » in the field
    - Ex : to publish Amazon posts, <https://www.facebook.com/Amazon/>
    - enter « Amazon » in the field
    - <https://www.facebook.com/metropole.rennes/>

Note : Public account with identifier [https://www.facebook.com/PhilipsTVFrance/?brand\\_redir=254731353380](https://www.facebook.com/PhilipsTVFrance/?brand_redir=254731353380) are not supported (not normalized). In this case, please find another Facebook pointer like <https://www.facebook.com/PhilipsTVFrance>

## Preview (default)

Warning: some images of Facebook posts may be cropped in the width depending on the type of JSON image encoding in the Web page. Indeed, in some cases, the width value is not available in the Facebook feeds. For more information, contact [support@innes.fr](mailto:support@innes.fr)
