

## Modifying a WebTV URI

The aim of this documentation is to explain how to modify a WebTV URI with Screen Composer G3 or PlugnCast G3, especially when a WebTV **YouTube** video ID has changed.

The WebTV URIs that can be displayed in full screen are grouped in a URI model pack available for download on <http://www.innes.pro/fr/support/>.

*Note : all the URL of the WebTV are hosted on **YouTube** servers.*

For example, the video **EuroNews** available on YouTube server at the 9th October 2018 was :

- FR:
  - o <https://www.youtube.com/embed/tdaKHmU5iOE?autoplay=1>
- EN
  - o <https://www.youtube.com/embed/1rGQ-kbmg1g?autoplay=1>
- DE
  - o <https://www.youtube.com/embed/vr3mTas9l8l?autoplay=1>

Unfortunately, at the date 19th October 2018,

- YouTube has already changed the YouTube video ID for **EuroNews - FR**
- YouTube does not host anymore the **EuroNews - DE** and **EuroNews - DE** WebTV.

So, in case of issue, you have to check that YouTube still hosting properly your WebTV with the same video ID. If not, try to find a new YouTube video ID for your WebTV.

## YouTube : Get the new YouTube video ID for your WebTV channel

When the WebTV YouTube video ID has changed, go to the YouTube Web site and search for WebTV channels by typing :

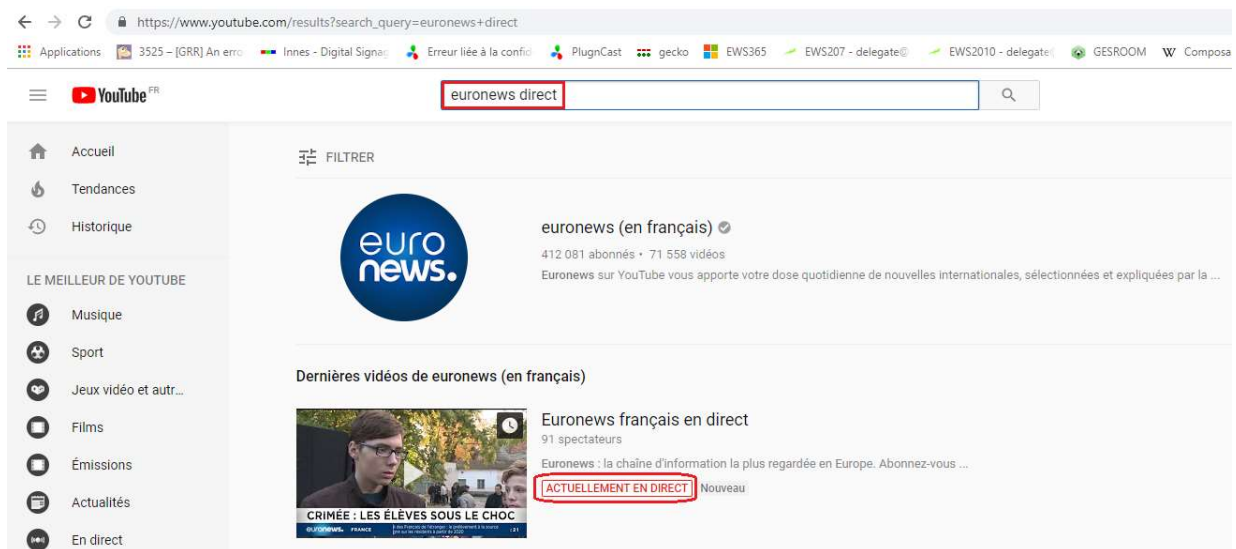

FR : « EuroNews Direct »

EN : « EuroNews Live »

DE : « EuroNews Live Espanol »

DE : « EuroNews Live deutschland »

IT : « EuroNews Diretta »

Once the WebTV is found, showing the mention **ACTUELLEMENT EN DIRECT** , click on it to get the YouTube video ID in the URL.

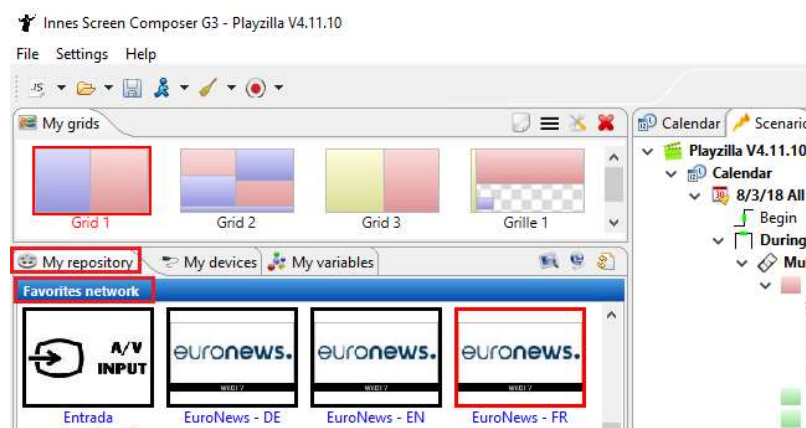

For example, here is the new the YouTube video ID for **EuroNews – FR** (19/10/2018): [IGMMMTJ3JkQ](https://www.youtube.com/watch?v=IGMMMTJ3JkQ).

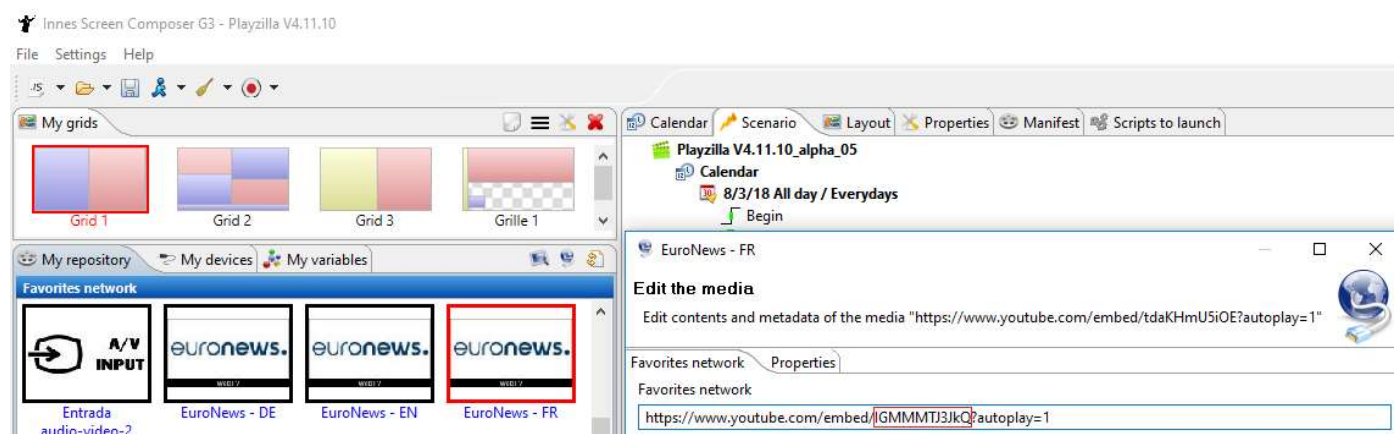

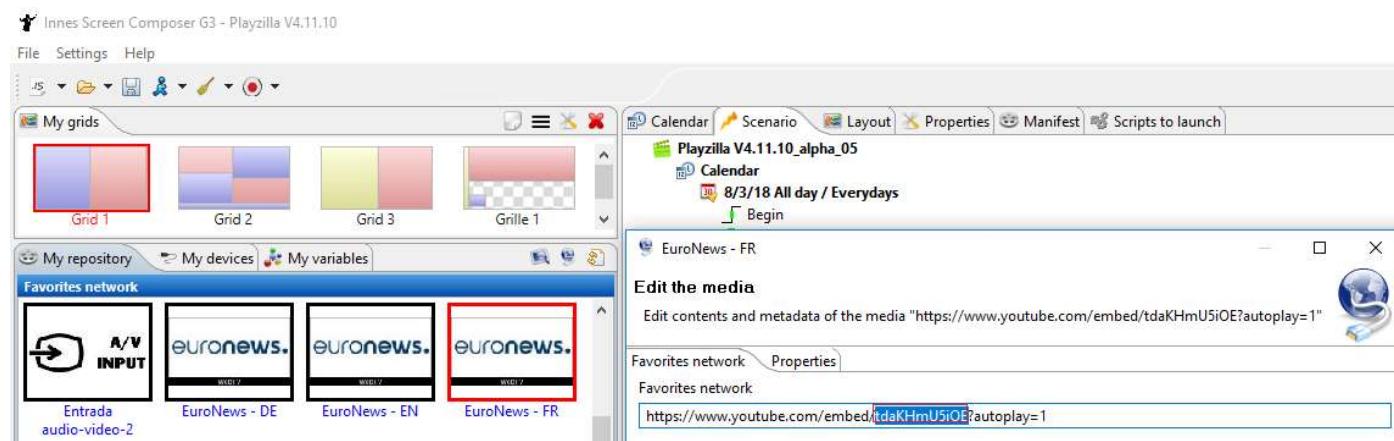

## Screen Composer G3

In Screen Composer G3, In **My Repository** select **Favorite Network**, select **EuroNews – FR** URI, and **Edit** it by a right clic.

*Note : let 's consider that the WebTV URI had been already created previously.*

Delete the obsolete YouTube video ID. And replace by the new YouTube video ID : [IGMMMTJ3JkQ](https://www.youtube.com/embed/IGMMMTJ3JkQ)

Save.

Copy paste the entire URL in your Web browser and check that the video is properly displayed in full screen.

Then publish this new WebTV URI on your Gekkota 4 device.

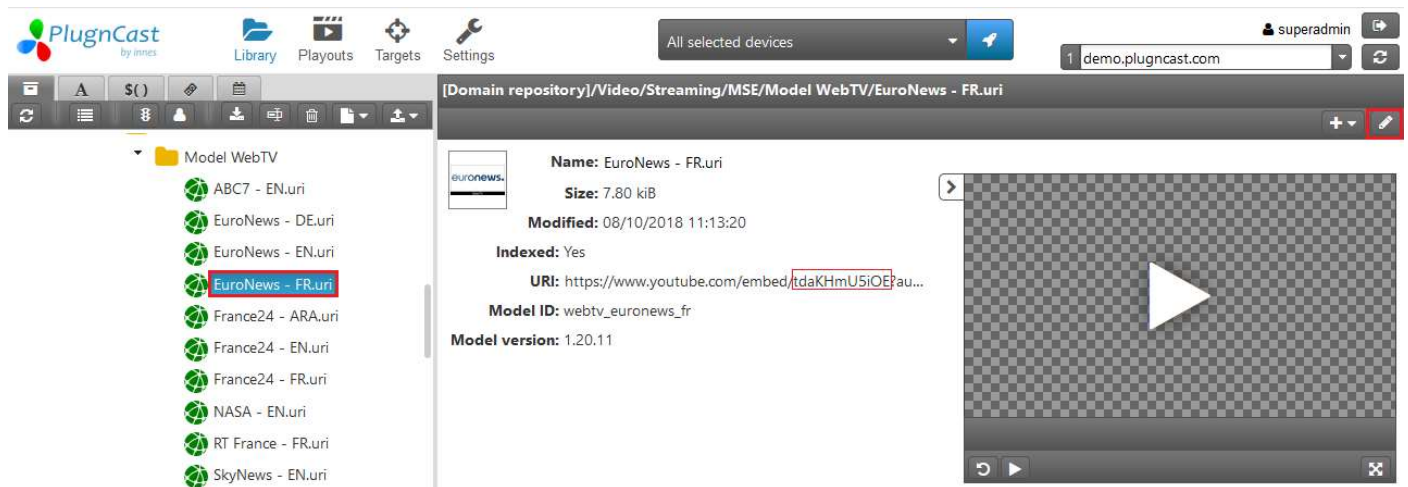

*Note : To create a EuroNews – IT, create a new EuroNews – FR URI :*

*Do the same as explained above (search for a video « Live EuroNews italian »), get the YouTube video ID (for example [L5QbfczLqZc](https://www.youtube.com/embed/L5QbfczLqZc), paste it in the URL, and save into **EuroNews – IT** (for example 19/10/2018) <https://www.youtube.com/embed/L5QbfczLqZc?autoplay=1>)*

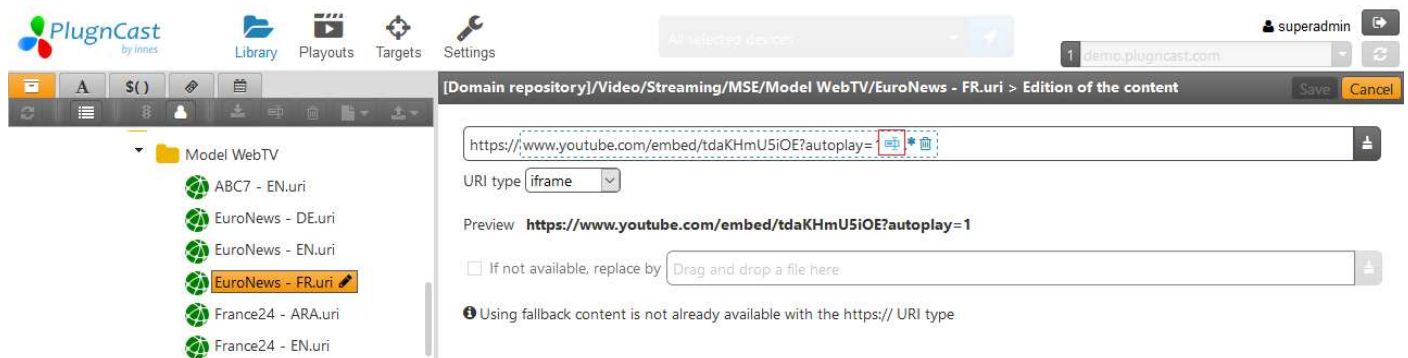

# PlugnCast G3

Note : let 's consider that the WebTV URI had been already created previously.

In your Library, select **EuroNews – FR** URI, click on the **Edit** button on the right.

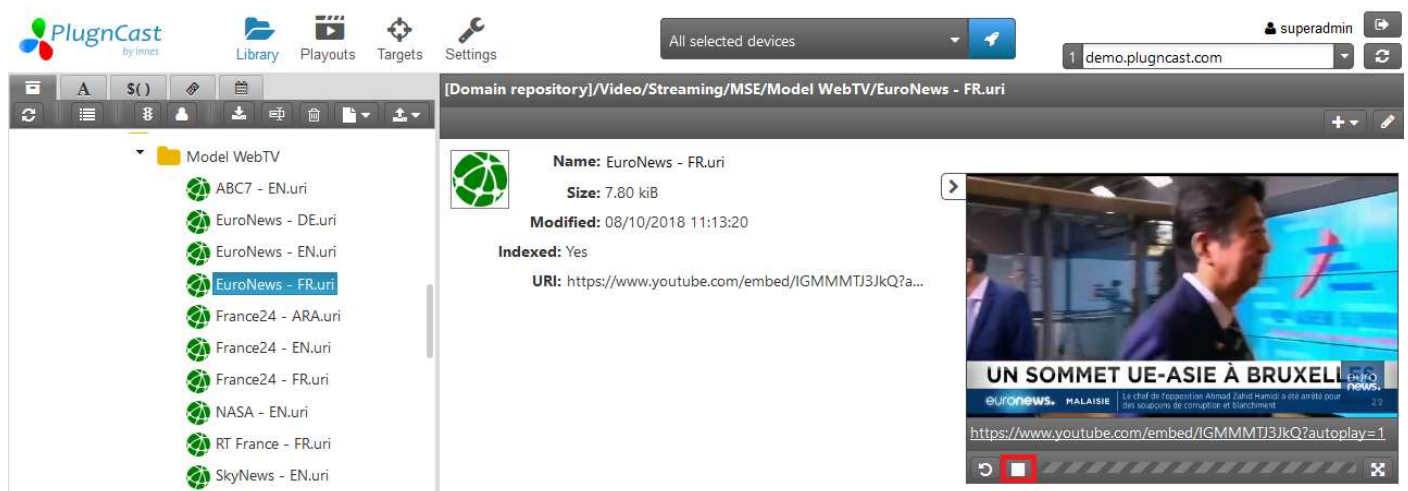

Fly over with the mouse the **Edit** input area until the hidden button  is displayed

Click on rename  and change the obsolete YouTube video ID by the WebTV EuroNews – FR YouTube video ID : **IGMMMTJ3JkQ**.

Save and press on the **Play** button  in the preview screen.

Note : To create a WebTV EuroNews – IT (Italian) :

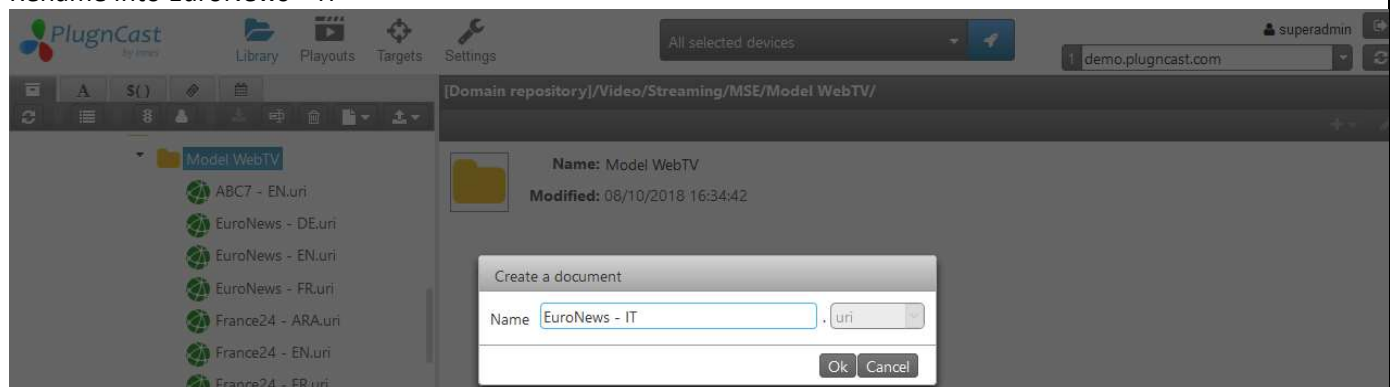

Select a directory then click on News from a model

Select EuroNews – FR

Rename into EuroNews – IT

Replace the **EuroNews – FR** YouTube video ID by the **EuroNews – IT** YouTube video ID [L5QbfczLqZc](https://www.youtube.com/embed/L5QbfczLqZc)
